FEAN Method Astrology AMB (Five Elements, Astrology & Numerology)

FEAN Method Astrology AMB: A Revolutionary Approach by Rajessh Paanday

FEAN Method Astrology AMB, a patented and groundbreaking innovation by **Rajessh Paanday**, Managing Director of OM Astrology AMC, aims to transform lives by harmonizing the five essential elements: Air, Water, Fire, Earth, and Sky.

FEAN Method Astrology AMB specializes in analyzing the **concentration levels of the five essential elements**—Air, Water, Fire, Earth, and Sky—within the human body. By evaluating these levels, the method identifies imbalances that may lead to mental, physical, or emotional challenges.

Also known as **FEAN Method Astrology AMB (Five Elements, Astrology & Numerology)**, this research-driven approach focuses on analyzing the concentration levels of these elements within the human body. By identifying imbalances, FEAN Method Astrology AMB uncovers the root causes of various challenges in life. It provides personalized insights and prescribes effective, tailored remedies to restore balance and enhance overall well-being.

At the core of FEAN Method Astrology AMB lies the **Lo Shu Grid**, an ancient numerological tool where each number corresponds to a specific element. FEAN Method Astrology AMB calculates the energy concentration of these elements based on the numbers in the grid. Imbalances in elemental concentrations can manifest as mental and physical health disorders, making the analysis crucial for understanding and addressing these issues.

What Sets FEAN Method Astrology AMB Apart?

Unlike traditional practices, FEAN Method Astrology AMB bridges the gap between **astrology** and **numerology**. While astrology offers insights into planetary influences, numerology interprets the significance of numbers. FEAN Method Astrology AMB combines both, focusing on the concentration levels of elements and their effects on life.

This innovative approach considers not only the elemental concentrations present at birth but also the real-time elemental imbalances experienced in day-to-day life. By addressing both, it provides a comprehensive solution that goes beyond conventional numerology practices.

This **distinctive method** evaluates both:

1. **Concentration Levels at Birth:** Derived from the Lo Shu Grid and planetary placements, providing a foundation of inherent energy balance.
2. **Real-Time Elemental Concentrations:** Reflecting current life situations and challenges.

By addressing both innate and situational imbalances, FEAN Method Astrology AMB goes beyond traditional numerology to provide tailored, actionable remedies for achieving balance in life.

Core Philosophy

According to **FEAN Method Astrology AMB**:

- Everything in the universe is made up of five elements: Water, Fire, Air, Sky (Metal), and Earth.
- Controlling the concentration levels of these elements in the body can influence mental and physical health.
- A balance in these elements allows an individual to achieve their goals and live a harmonious life.

The imbalance or deficiency of these elements creates problems that may manifest as mental, emotional, or physical disorders. FEAN Method Astrology AMB uniquely combines astrological planetary insights and numerical interpretations to analyze and correct these imbalances.

We calculate the concentration levels of all elements based on the Lo Shu Grid, which is created using the real date of birth.

Basic Terminology in FEAN Method Astrology AMB

- Loshu Grid/Birth Grid
- Numbers/Elements (1-9)
- Moolank & Bhagyank
- Concentration level of elements

Standard Loshu Grid :

The Lo Shu grid is a 3x3 magic square that is used in FEAN Method Astrology AMB, numerology and feng shui. It is also known as the sacred square. How it works The grid is made up of nine cells, each representing a different aspect of life. The numbers 1–9 are arranged in the grid's three rows and three columns. The sum of any three numbers in the grid, whether added horizontally, vertically, or diagonally, is 15. Numbers, Moolank & Bhagyank from a person's birth date are assigned to specific boxes in the grid. The pattern of numbers in the grid can reveal insights into a person's strengths, weaknesses, and overall life balance.

FEAN Method Astrology AMB™

What is Moolank and How to Calculate ?

In Numerology and FEAN Method Astrology AMB, Moolank refers to the Root Number of a person, which is derived from their date of birth. This number holds significant influence over **personality, characteristics, strengths, and weaknesses**.

Moolank plays a crucial role in FEAN Method Astrology AMB, as it represents the core elemental energy associated with a person's birth date.

- **Moolank is calculated by reducing the date of birth (day only) to a single-digit number (1 to 9).**

Formula:

- **Moolank = Sum of the Digits of the Birth Date (Reduced to a Single Digit)**

Examples:

1. If the Birth Date is 5th January 1995
Moolank = 5 (Single digit, so no further reduction)
2. If the Birth Date is 14th July 1987
 $1 + 4 = 5$
Moolank = 5

Moolank (Root Number) and Their Meanings

Each Moolank is associated with a specific element and planetary energy:

Moolank	Element	Planet	Personality Traits
1	Water	Sun (Surya)	Leadership, confidence, authority, intelligence, independence
2	Earth	Moon (Chandra)	Emotional, caring, sensitive
3	Soft Wood (Air)	Jupiter (Guru)	Social, knowledgeable, spiritual, creative
4	Hard Wood (Air)	Rahu	Practical, disciplined, hardworking, logical
5	Earth	Mercury (Budh)	Adaptable, intelligent, quick thinker, communicator
6	Sky (Yellow Metal)	Venus (Shukra)	Luxury-loving, charming, artistic, romantic

8	Earth	Saturn (Shani)	Disciplined, responsible, serious, strong-willed
9	Fire	Mars (Mangal)	Courageous, aggressive, energetic, goal-oriented

What is Bhagyank (Destiny Number)?

In Numerology, Bhagyank (also known as Destiny Number) represents a person's overall life purpose, destiny, and the major influences shaping their life journey. It is derived from the full date of birth (Day + Month + Year) and provides insights into a person's fate, strengths, challenges, and opportunities.

In FEAN Method Astrology AMB, Bhagyank plays a crucial role in understanding a person's elemental balance and planetary influences.

How to Calculate Bhagyank (Destiny Number)?

- Bhagyank is calculated by adding all the digits of the full birth date and reducing it to a single-digit number (1 to 9).

Formula:

- Bhagyank = Sum of Birth Date Digits (Day + Month + Year), Reduced to a Single Digit**

Examples:

1. If the Birth Date is 5th January 1995

$$5 + 1 + 1 + 9 + 9 + 5 = 30$$

$$3 + 0 = 3$$

$$\text{Bhagyank} = 3$$

2. If the Birth Date is 14th July 1987

$$1 + 4 + 7 + 1 + 9 + 8 + 7 = 37$$

$$3 + 7 = 10$$

$$1 + 0 = 1$$

$$\text{Bhagyank} = 1$$

How to Measure Concentration level of Five Elements

In FEAN Method Astrology AMB, the concentration level of the five elements—Water, Fire, Air, Sky (Metal), and Earth—is measured using the Lo Shu Grid, which is created based on a person's real date of birth.

Steps to Measure the Concentration Level of the Five Elements:

1. Create the Lo Shu Grid from the Date of Birth

- Write down the date of birth (DD/MM/YYYY).
- Place each digit in the standard 3x3 Lo Shu Grid according to its predefined position.
- Also fill Person's Moolank and Bhagyank in the Lo Shu Grid.

2. Identify the Numbers Present in the Grid

Each number from 1 to 9 represents a different element:

Numbers	Elements
Number 1	Water element
Number 2	Earth Element
Number 3	Soft Wood Element (Air element)
Number 4	Hard Wood Element (Air element)
Number 5	Earth Element
Number 6	Golden Colour Metal Element (Sky Element)
Number 7	White Metal Element (Sky Element)
Number 8	Earth Element
Number 9	Fire Element

3. Count the Frequency of Each Number

- Each number's frequency in the Lo Shu Grid represents the concentration level of that element in the body at birth.
- Standard Concentration Rule:

If a number appears once, its element is **balanced** (50%).

If a number appears twice, the element reaches 100% (**imbalanced state**).

If a number appears three times (e.g., 999), the element reaches 150% (excess). (**imbalanced state**).

If a number appears four times (e.g., 9999), the element reaches 200%, and so on. (**imbalanced state**).

Life Set when Planet Connect

FEAN Method Astrology AMB™

How to Measure Concentration level of Five Elements

In FEAN Method Astrology AMB, the concentration level of the five elements—Water, Fire, Air, Sky (Metal), and Earth—is measured using the Lo Shu Grid, which is created based on a person's real date of birth.

Steps to Measure the Concentration Level of the Five Elements:

1. Create the Lo Shu Grid from the Date of Birth

- Write down the date of birth (DD/MM/YYYY).
- Place each digit in the standard 3x3 Lo Shu Grid according to its predefined position.
- Also fill Person's Moolank and Bhagyank in the Lo Shu Grid.

2. Identify the Numbers Present in the Grid

Each number from 1 to 9 represents a different element:

Numbers	Elements
Number 1	Water element
Number 2	Earth Element
Number 3	Soft Wood Element (Air element)
Number 4	Hard Wood Element (Air element)
Number 5	Earth Element
Number 6	Golden Colour Metal Element (Sky Element)
Number 7	White Metal Element (Sky Element)
Number 8	Earth Element
Number 9	Fire Element

3. Count the Frequency of Each Number

- Each number's frequency in the Lo Shu Grid represents the concentration level of that element in the body at birth.
- Standard Concentration Rule:

If a number appears once, its element is **balanced** (50%).

If a number appears twice, the element reaches 100% (**imbalanced state**).

If a number appears three times (e.g., 999), the element reaches 150% (excess). (**imbalanced state**).

If a number appears four times (e.g., 9999), the element reaches 200%, and so on. (**imbalanced state**).

4. Interpret the Elemental Balance

- **Balanced Elements (50%)** → No issues, natural harmony.
- **Excess Elements (>100%)** → Imbalanced, causing problems related to that element.
- **Missing Elements (0%)** → Deficiency, indicating lack of qualities associated with that element.

5. Adjusting the Elemental Imbalance

- If an element is excessive (>100%) → Reduce it by donating items related to that element.
- If an element is missing (0%) → Increase it by wearing Rudraksha, using certain colors, or keeping specific items.
- If the Fire-Water balance is disturbed, it affects mental health, confidence, and overreaction tendencies.
- If the Wood-Metal balance is disturbed, it affects social life, financial stability, and relationship harmony.

⚠ What is imbalanced state?

In FEAN Method Astrology, when an element's concentration reaches **100% at birth**, it is considered an imbalanced state. Here's why:

1. Elements Continuously Increase After Birth

- After birth, **the five elements naturally increase in the body** because the universe has an infinite concentration of all elements.
- As per the natural flow of energy, elements always move from high density to low density. This means that after birth, external energy from the universe keeps increasing the element's concentration in our body.
- **If an element is already at 100% at birth, its concentration will only increase further, leading to an excessive state over time.**

2. Excess Element Creates an Imbalance

- **When an element exceeds 100% in the body, it disrupts the balance of planetary energy** associated with that element.
- This imbalance causes the body to absorb more negative energy and **reject positive energy, leading to various problems in life.**

Life Set when Planet Connect

3. Impact on Health and Longevity

- Due to the excess element, the body starts to **weaken over time**.
- **This reduces immunity, increases health issues, and gradually affects lifespan.**
- A person with high concentration of a specific element may suffer from diseases, emotional struggles, or life obstacles caused by that imbalance.

4. Cause of Struggles in Life

When an element exceeds **100%**, it starts affecting different aspects of life:

- **Excess Fire (9)** → Anger issues, blood pressure problems, aggression, overconfidence.
- **Excess Water (1)** → Overthinking, emotional instability, weak decision-making.
- **Excess Earth (2, 5, 8)** → Overattachment, delays in work, slow progress.
- **Excess Metal (6, 7)** → Over-luxury desire, laziness, dependency on others.
- **Excess Wood (3, 4)** → Over-socialization, attracting opportunistic people, financial loss due to society.

The Real Cause of Life's Problems

- **Every problem in life arises due to the imbalance of elements.**
- When an element becomes excessive (**>100%**), it starts **controlling the mind and body**, leading to different mental, physical, and emotional challenges.
- This also affects planetary energies, leading to unfavorable astrological results.

Solution to Restore Balance

- To reduce the impact of excess elements, one should **donate or release that element** (e.g., donating Fire-related items if Fire is excessive).
- **If an element is missing, one should increase its presence** through specific remedies.
- **Balancing all five elements is the key to good health, stable emotions, and a prosperous life.**

What is a Balanced State in FEAN Method Astrology?

In FEAN Method Astrology, a **balanced state** means that the five elements (Water, Fire, Air, Sky/Metal, and Earth) are present in the body in the right proportion, neither in excess nor in deficiency. This balance ensures that the body, mind, and planetary energies function harmoniously, leading to a healthy, stable, and successful life.

How to Identify a Balanced State?

1. In the Lo Shu Grid:

- If any number (1 to 9) **appears once**, it means that the corresponding element's concentration level is **50%**, which is a **balanced state at birth**.
- A balanced element ensures that it grows naturally after birth without creating an imbalance in the body.

2. In the Body and Life:

- A balanced state means that **no element is dominating or lacking**, allowing a person to have:

Good health (no major diseases).

Stable emotions (no overthinking, anxiety, or excessive aggression).

Strong decision-making skills (neither too impulsive nor too hesitant).

Harmonious relationships (ability to maintain healthy social and personal bonds).

Steady career and financial growth (consistent opportunities without major struggles).

- Another example, **if Water (1) and Fire (9) are both present twice or thrice**, it also indicates a Fire-water balance to each other, which is a balanced state also, this can be very harmful if number 1 or 9 is artificially created by us in our life, then it will create imbalances and problems may rise as per element and planet in our horoscope.

Meaning of a Balanced State

A balanced state means that all five elements are present in a way that supports a person's growth without creating stress, obstacles, or health issues.

Why is Balance Important?

- If an element is excessive (>100%)**, it creates problems (e.g., excess Fire leads to anger issues, high BP, stress).
- If an element is missing (0%)**, it causes deficiency problems (e.g., missing Water leads to very shy nature, weak communication).
- A balanced state ensures that a person has fewer struggles, better opportunities, and overall success in life.**

Chaldean Numerology Name Frequency Chart

In Chaldean Numerology, each letter in a name is assigned a numerical frequency based on vibrational energy. The Chaldean system differs from the Pythagorean system and is considered more accurate for name numerology calculations because it incorporates planetary influences.

Chaldean Numerology Letter-to-Number Chart

Letter	Number
A, I, J, Q, Y	1
B, K, R	2
C, G, L, S	3
D, M, T	4
E, H, N, X	5
U, V, W	6
O, Z	7
F, P	8

How to Calculate Name Frequency in Chaldean Numerology

Step 1: Write your full name.

Step 2: Assign the Chaldean number to each letter.

Step 3: Add up all the numbers to get a total frequency number.

Step 4: Reduce the total to a single-digit.

Example Calculation:

Name: "RAHUL"

- $R (2) + A (1) + H (5) + U (6) + L (3) = 17$
- $1 + 7 = 8$
- **Final Name Frequency = 8** (Power, karma, wealth, struggles, and justice. - Saturn Energy)

◆ Special Case in FEAN Method Astrology: Missing Number 3 & Present Number 6 or 66 in Lo Shu Grid, but Still Achieving Great Success in Life

Normally, when **Number 3 is missing** in the Lo Shu Grid (which represents the Air/Soft Wood element and controls the energy of Jupiter), it indicates:

- Poor social connectivity.
- Lack of strong support from society or friend circles.
- Fewer career opportunities due to weak public networking.
- Reduced wisdom, learning, and guidance from Jupiter.

Principle –

"Whenever the concentration level of the Moolank or Bhagyank becomes the highest in the Lo Shu Grid, the element associated with it becomes both the person's weakness and strength."

The key is for the person to understand themselves deeply and figure out how to transform that weakness into their greatest strength.

For example –

1. Sundar Pichai – 10/06/1972 (Moolank - 1, Bhagyank - 8)

When to Wear Rudraksha in FEAN Method Astrology?

- ✓ If a number is missing in the Lo Shu Grid → Rudraksha is **mandatory** to restore balance.
